Contain Outbreak Management Fund COMF

This special funding pool totals over £500,000 and individual grants of up to £5000 will be awarded per project. The Fund is designed to support the costs associated with ongoing public health and the outbreak management costs of tackling Covid-19. The pandemic has continued to provide challenges to Essex communities and their statutory services. The emergence of new Covid-19 variants in late 2020, which transmit up to 70% faster than the original strain, means that in recent months Essex communities have seen some of the highest levels of infection in the country. This has led to increased demand on voluntary and community sector services and on health services. Throughout the pandemic local communities have stepped up to provide support which has ensured communities have stayed connected, been able to self-isolate as required and provided first line self-organised community support to those in need. Funding is therefore allocated from the COMF to provide the VCS with financial aid to respond to, and further contain, the spread of Covid-19. Grassroots Charity

The grant rounds are continuing as normal (albeit virtually for the time being), and we welcome applications from groups to assist them in responding to the Covid19 situation. Previous recent beneficiaries who now fear that they will not be able to spend their funds as anticipated are invited to get in touch by email to request a time extension or change of use. The Trust does not provide large grants because our aim is to help as many organisations as possible. Priority is given to smaller less well-known groups who may not otherwise find the funds they need. The Trust's aim is to help as many organisations as possible and therefore the majority of grants awarded are for less than £1000 next closing date **31 August**

Extra £40m to help victims during pandemic and beyond

Victims of rape and domestic abuse will be helped by a major £40m funding boost for specialist support services, the Government has confirmed. The new investment will allow support organisations to recruit more staff, keep helplines open for longer and adapt to remote counselling where necessary – ensuring help remains available for those who need it. Crucially, £16m will fund the recruitment of more independent sexual violence and domestic abuse advisers across the country. They provide emotional and practical support for victims, while guiding them through the criminal justice process which many can find daunting.
